

ORGANISING COMMITTEE:**PATRON:**

Hon'ble Vice Chancellor
University of Rajasthan

HOD:

Prof Anju Bhatia

SAP COORDINATOR:

Prof Pooja Talikoti

SAP DY. COORDINATOR:

Dr Ruby Jain

ORGANIZING SECRETARIES:

Dr Mukta Agrawal
Dr Nimali Singh
Email: nutrisaporganizers@gmail.com

CONVENERS:

Dr Kanika Varma
Dr Reshma Boolchandani

ADVISORY BOARD:

Prof Beena Mathur
Prof Anju Bhatia
Prof Pooja Talikoti
Prof Anuradha Goyle
Dr Lalit Bharadia

COMMITTEE CONVENERS:

Prof Pooja Talikoti: Finance
Prof Anuradha Goyle : Certificates
Dr Surbhi Purohit: Venue
Dr Mukta Agrawal : Scientific Committee & Proceedings
Dr Kavita Kordia: Photography
Dr Sunita Agrawal : Invitation
Dr Ruby Jain: Media & Publicity
Dr Kanika Varma: Scientific Committee
Dr Shubha Dube: Registration
Dr Nimali Singh: Proceedings
Dr Reshma Boolchandani: Accommodation
Dr Lalita Vatta: Catering

COMMITTEE MEMBERS:

Dr Akanksha Mahendra
Ms Manju Choudhary
Ms Kavita Kachawa
Ms Kesar Choyal

IMPORTANT DATES

Last Date for Submitting Abstract for Oral/ Poster Presentation: 15th December 2014

Early Bird Registration: 15th December 2014

Registration with Late Fees: 5th January 2015

REGISTRATION

Category	Up to 15 Dec., 2014	Up to 5 Jan., 2015	Spot Registration
Student	Rs. 900	Rs. 1000	Rs. 1200
Students in a group of 7 of the same institution	Rs. 700/ student	Rs. 800/ Student	N.A.
Delegates	Rs. 1600	Rs. 1800	Rs. 2000

- Registration: email sapnutriregister@gmail.com
Prior registration mandatory for all oral/poster presentations
- Registration form & Instructions for Abstract are available on www.uniraj.ac.in (Academic Events: Seminar)

ABOUT JAIPUR

The weather in Jaipur is cold in January ranging between 8° to 22°C . It is advised to carry woollens. Jaipur is a part of the Golden triangle i.e. Delhi, Agra & Jaipur. It is well connected by Road, Rail & Air. Jaipur is famous for its historical architecture, jewellery, textiles, blue pottery & handicrafts.

ADDRESS FOR CORRESPONDENCE

NATIONAL SEMINAR

On

**MISSED OPPORTUNITIES IN
CHILD NUTRITION HEALTH
AND DEVELOPMENT**

30th -31st January, 2015

Organized by

DEPARTMENT OF HOME SCIENCE

University of Rajasthan

Under

UGC SAP

(Special Assistance Program)

Venue:

University of Rajasthan

Jaipur

Supported by

FROM THE DESK OF ORGANISING COMMITTEE

Children are the future of the nation, their health, growth and development is of utmost importance. During this critical period of growth and development there are many gaps which are actually missed opportunities for giving them the best of nutrition and care for their optimal growth and development. Nutrition is a foundation for healthy development. Poor nutrition leads to ill-health and ill-health contributes to further deterioration in nutritional status. These effects are most dramatically observed in young children, who bear the brunt of the onset of malnutrition and suffer the highest risk of disability and death associated with it. Anthropometric measurements are key tools for assessment of nutritional status and diagnosis of malnutrition, if not done regularly and routinely by the health & nutrition service providers, then these children miss the opportunity for nutritional assessment and detection of malnutrition. Now, we have facility based treatment for severe acute malnourished child, and not getting on-going community-based nutrition support they need, that is a missed opportunity. According to Lancet and World Bank report (2012), the under five mortality rate is 56 per one thousand live births and the child mortality report-2012, released by UNICEF has stated that India has the highest child mortality in the world. In India under five mortality rate remains alarming in spite of integrated and comprehensive nutrition and health care delivery system. Home Scientists can definitely contribute towards minimising missed opportunities in this regard through timely interventions.

The incidence of malnutrition rises sharply during the period from 6 to 24 months and the deficits acquired at this age are difficult to compensate for later in childhood. Optimal infant and young child feeding ensure a child is protected from both under and over nutrition and their consequences.

Decision Tree allows for prioritization of strategies and selection of interventions appropriate for each local context. This include, counselling and education of mothers about optimal feeding and care practices and use of locally available foods, as well as strategies to improve availability and affordability of quality local foods. The Decision Tree would help with choosing additional components for the program, both in contexts where adequate local foods are available but supplementation may be needed to fill in nutritional gaps of local diets in certain groups/ areas or where there is generalized food insecurity.

OBJECTIVES

This seminar will focus on the integrated, comprehensive Nutrition & Health care delivery and contribution towards minimising missed opportunities.

- Infant and young child nutrition and its role in child survival, growth and development.
- Nutritional assessment and consequences of child malnutrition.
- Elimination of missed opportunities in bridging the gap in the Health and Nutrition continuum of care.
- Integration of Nutrition and Health, Nutrition and development and Nutrition and other sectors for interventional strategies.

THEMES

I CHILD NUTRITION

- Child Malnutrition: Assessment and Consequences
- Optimal Infant and young child nutrition and availability and affordability of local foods
- Junk food and ready to eat processed foods.
- Food Intolerances and Allergies

II CHILD HEALTH AND SURVIVAL

- Childhood Diseases and timely referral
- Diarrhoeal Management and Nutrition

III CHILD GROWTH AND DEVELOPMENT

- Growth Monitoring
- Physical and mental developmental milestone.
- Psycho social and emotional development through stimulation
- Long term consequences of malnutrition

IV MATERNAL HEALTH AND NUTRITION

- Adolescent Pregnancies
- Pre Pregnancy Nutritional Status
- Nutritional Care during Pregnancy and Lactation

V STRATEGIES AND INTERVENTIONS FOR ELIMINATION OF MISSED OPPORTUNITIES

- Health and Nutrition delivery System
- Nutrition and Health Education
- Growth Monitoring and Promotion
- Child Health and Nutrition Programs
- Food and Nutrition security.
- Micro-Nutrient supplementation and food fortification.
- Role of National and International Agencies.
- Social marketing and media.
- Clean water, hygiene and sanitation

VI OTHER CONTEMPORARY ISSUES IN HEALTH AND NUTRITION

ORAL/ POSTER PRESENTATIONS

GUIDELINES FOR ABSTRACT/POSTER PRESENTATION

- Maximum size of the poster: 110 cm x 115 cm
- Word limit of Abstract: 250 words, Use Times New Roman Font. Title in Bold, Font 12, Abstract in font size 11, Single Spacing, Authors Name, Name of Institution in Italics. Soft Copy of Abstract is essential for acceptance.
- Duration for Oral presentation : 7 Minutes (Power Point Presentation)
- Last date for submission of abstracts : 15th December 2014
- Email your abstract and full paper at nutrisapsscientific@gmail.com
